

The Project Table as design team facilitator.

The project table is specially developed by lecturers Product Design to be used in brainstorm sessions and review meetings. With the Project Table you can share ideas in a lean agile way with a variety of roles involved in your project. Cooperation around one table is the basis of this concept. Free thinking and sketching with marker on the top surface of the table as if it is a whiteboard. Ideas, concepts or theories are projected on the glass table top from several laptops or tablets through a beamer mounted underneath and comments can be added. With a camera the generated ideas are harvested automatically so during the brainstorm you don't have to worry about taking notes. There is no technological barrier for the user. The Project Table offers space for four laptops and/or tablets. About ten people can participate in one session. The project table is mobile within a building and can be used in different (class)rooms. The Project Table is used in different student project and turns out to be a very helpful facilitator. During the workshop you can experience the Project Table yourself.
